

Grafica's **nano-sharpner** SHARP & SAVE

HIGH QUALITY DIAMOND WHEEL SQUEEGEE SHARPENER

Its one of the most handy yet power device with high quality fine diamond wheel to sharp most common used squeegee rubbers in screen printing.

The diamond wheel attached with a motor mounted on a precision linear guide ways gives excellent smoothness while moving the wheel during sharpening.

A simple push button when pressed runs the motor at high speed delivers very sharp edge. A spring loaded mechanism holds the squeegee rubber firmly during sharpening to avoid vibration ensuring superior edge quality.

The complete body of this sharpener is made of high quality, light weight extruded aluminum specially designed to make the most compact mobile device.

Unique Features:

- 1. Table top, light weight**
 - a. For easy mobility
- 2. Single phase**
 - a. Plug n play
- 3. High speed vibration free motor**
 - a. Ensure smooth finish
- 4. High quality precision linear guide ways**
 - a. For easy movement of diamond wheel
- 5. Diamond wheel**
 - a. For smooth and sharp edge quality

There are many great advantages of keeping sharp edge squeegee rubbers and sharpeners, here are few important ones:

1. Reuse squeegees, reduce squeegee consumption, reduce cost.
2. Reduces ink consumption
3. Reproduces superior image quality
4. Improves edge definition
5. Delivers accurate ink film thickness
6. Increases profit and productivity

TECHNICAL DATA:

Common Data	NANO-SCREEN MAKER GF-22 NS
Max. Sharpening Capacity	22" (Inch)
Power Supply	220 V AC / Single Ph / 6 Amps / 50 Hz
Total Power Consumption	0.4 kW
Overall Dimension (In Feet)	2.6' W x 1.0' D x 1.0' H

- Continues improvement is an on going process at Grafica Flextronica, hence technical specifications, features and data are subject to change without notice.
- Servo stabilizer is not supplied along with the machine
